

COMPUTATIONAL AND DATA-DRIVEN ASTROPHYSICS: A PRACTICAL PYTHON WORKSHOP

Presented by: Lanz Anthonee A. Lagman

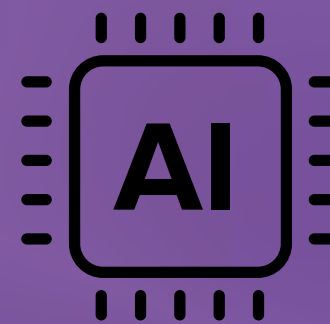

A brief background about this speaker

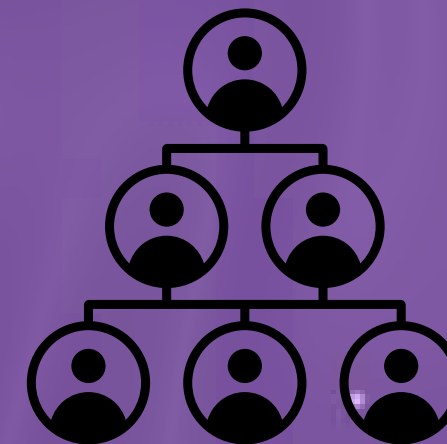

Currently doing
PhD research
full-time

Former lead DS
w/ FinTech
client

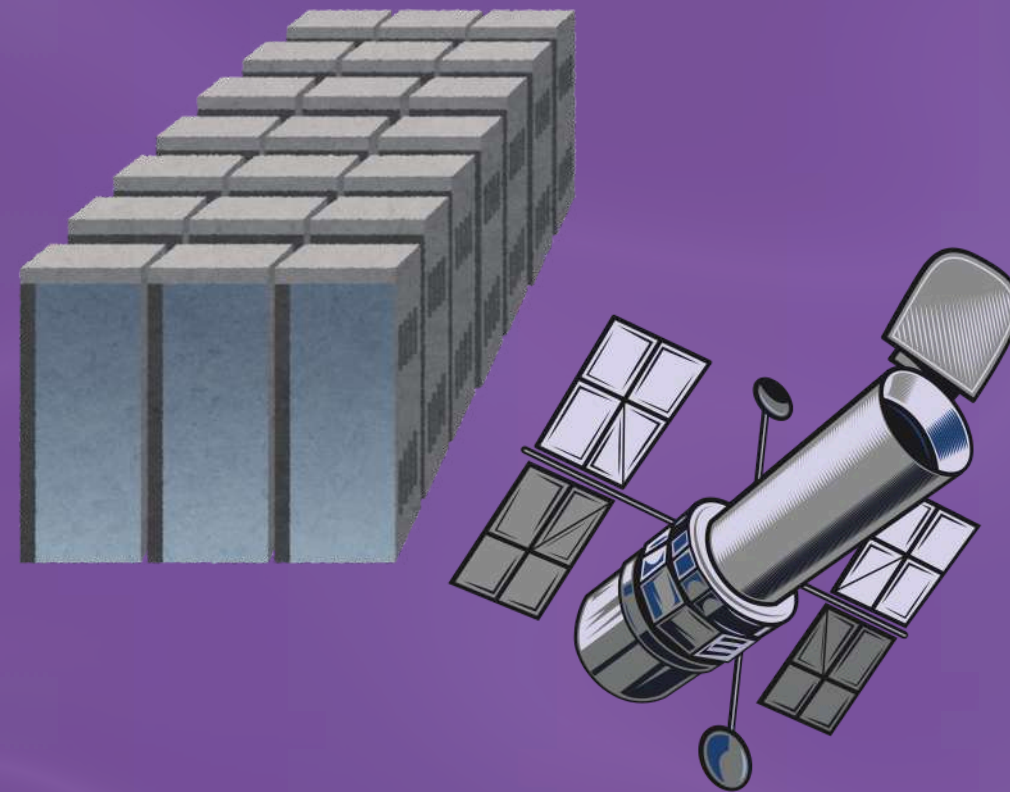

Head Director
of a student
DS Org

Lots of Data

Lots of Tools

**Not Enough
Scientists**

Astronomy & Astrophysics Today

**We run it top to
bottom, together.**

**Self-paced on your own
machine. Finishing is
optional.**

**Interrupt anytime.
Nothing here is too
basic to ask.**

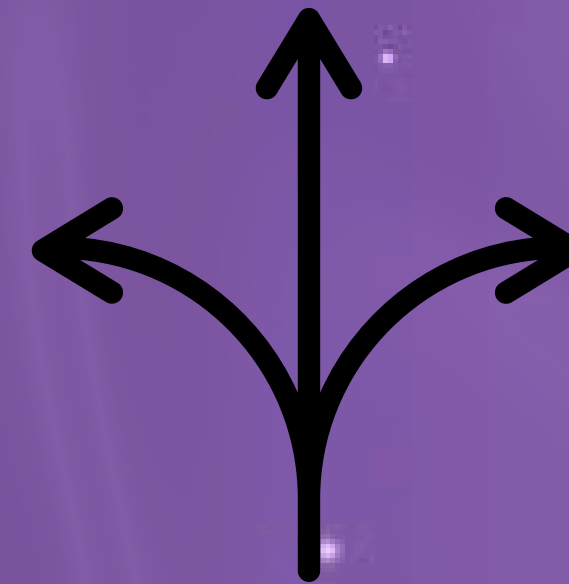

Part I Guidelines

**Pair up, form a group,
or go solo.**

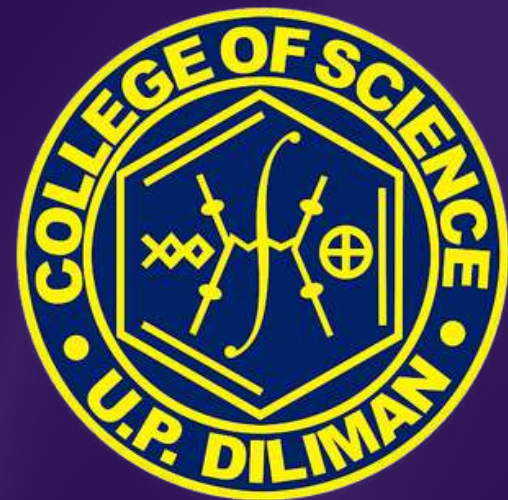

**Present if you want to.
No one has to.**

**Multiple tracks. One is
a full outcome.**

Part II Guidelines

THANK YOU!

Open for questions.
